9262-1 / 9262-2 High-Temperature Self-Emulsifying Defoamer

Grades: 9262-1, 9262-2 · Form: Self-emulsifying emulsion · Chemistry group: Silicone & Ether

1. Product description

Developed with major domestic oilfields for high-temperature, high-salinity production. Grafted silicone polyethers plus specially modified polysiloxanes knock out foam from extraction, filtration and gathering fast.

2. Typical properties

Property	9262-1	9262-2
Appearance	White emulsion	White emulsion
Active content	35.0±1.0	30.0±1.0
Viscosity (25 °C, mPa·s)	500-2500	500-2500
pH	6.0-8.0	6.0-8.0
Ionic type	Non-ionic	Non-ionic

Values in the table are typical and indicative. They describe the grade as normally supplied and are not a contractual specification; the values confirmed for your order are those stated on the order confirmation.

3. Typical applications

Crude oil extraction · Oilfield filtration · Oil gathering and transport · Oil-water separation · Enhanced oil recovery

4. Product characteristics

· Rapid elimination of foam in extraction and gathering
· Self-emulsifying in the produced water
· High-temperature performance
· Improves oil recovery rate
· Effective in high-salinity, high-water-cut wells

5. Addition and dilution

Typical addition is 0.05–0.5 % on the weight of the foaming system, established in your own trial at process temperature. Emulsion grades are normally diluted with water before addition and added continuously where the foam forms continuously. Diluted emulsions are used within the working shift; do not store them long term.

6. Packaging and storage

Supplied in the packing agreed for the order — drums, IBC totes or composite cartons for powder grades. Store in the closed original packing, out of direct sunlight, within 5–35 °C, and protect emulsions from freezing. Shelf life is stated on the product label; batches are traceable by lot number.

7. Safety and documentation

A model-specific GHS safety data sheet is issued on request for every model listed above; it is not reproduced here because classification follows the exact grade and the destination regulation. Handling guidance for the family: avoid eye and skin contact, use gloves and goggles, ensure ventilation, and do not discharge concentrates to drains.
